Chapter ix organisms consisting of one cell A. adult form and structure Remarks on the Conception of the Cell as an Elementary Organism we saw early in the chapter on The Organism and its Cells that the cell may be advantageously looked upon as an elementary organism. The warrantableness of thus regarding it as set forth by Carl Briicke, who first clearly reached the perception, should be recalled. This conception is warranted, Briicke said, by the fact that the cell possesses an organization of another sort than that pertaining to its molecular structure. While we may not subscribe to the implication of his doctrine that the cell has an organization wholly independent of its molecular structure, yet we must endorse his conception that it has a structure genuinely unique as contrasted with that of any non-living body; and must reckon the perception of...
