Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Autogenous Welding and Cutting The literature of autogenous welding technique has been enriched lately in many valuable ways, and there exist a large number of works which cover this field. Autogenous welding is a process intended for general introduction both in small workshops and in large factories. The range of welding technique is so wide that a thorough study of the process requires extensive research which makes great demands on the time of the reader. A pocket book of brief compass will be welcome to the works engineer, to the works foreman, and to the practical autogenous welder; in which the most important elements of the process are placed together in an easily available manner, and which shall be a faithful companion and a reliable adviser in connection with the various questions arising in practice. The object of the present work is to meet these requirements and I pass it on to the general public in the hope that it will be favorably received and fulfil its task. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
