Reviews

It is an awesome book that we have possibly go through. It is actually writter in straightforward words and phrases and not confusing. It is extremely difficult to leave it before concluding, once you begin to read the book.

EQUADIFF IV

Springer Mrz 1979, 1979. Taschenbuch. Book Condition: Neu. 235x155x25 mm. This item is printed on demand - Print on Demand Titel. Neuware - Invariant sets for semilinear parabolic and elliptic systems.- On the numerical solution of nonlinear partial differential equations on divergence form.- Application of the averaging method for the solution of boundary problems for ordinary differential and integro-differential equations.- Solution set properties for some nonlinear parabolic differential equations.- Asymptotic invariant sets of autonomous differential equations.- Algebraic methods in the theory of global properties of the oscillatory equations $Y = Q(t)Y$.- Stability problems in mathematical theory of viscoelasticity.- On the branching of solutions and Signorini's perturbation procedure in elasticity.- Differential subspaces associated with pairs of ordinary differential operators.- Control and the Van der Pol equation.- On properties of spectral approximations.- Singular perturbations and linear feedback control.- On some inverse problems for partial differential equations.- Nonlinear noncoercive boundary value problems.- On the iterative solution of some nonlinear evolution equations.- Exponential representation of solutions of ordinary differential equations.- The Rayleigh and Van der Pol wave equations, some generalizations.- The Dirichlet problem.- Multiple solutions of some asymptotically linear elliptic boundary value problems.- Dual finite element analysis for some unilateral boundary value problems.- Gradient alternating-direction methods.- Nonlinear parabolic boundary value problems with the time derivative in the boundary conditions.- Variational and boundary value problems for differential equations with deviating argument.- On a general conception of duality in optimal control.- Boundary value problems for systems of nonlinear differential equations.- Boundary behavior of potentials.- Some modifications of sobolev spaces and non-linear boundary value problems.- Some problems in neutron transport theory.- On formulation and solvability of boundary value problems for viscous incompressible fluids in domains with non-compact boundaries.- Boundary value problems at resonance for vector second order nonlinear ordinary differential equations.- Behaviour of solutions to the dirichlet problem...
